

# Game: Human Tic Tac Toe

**Purpose:** Game for groups of 10-15 young people with minimal resources needed.

Place out 9 chairs, in 3 rows of 3, all facing the same way. Divide your group into two teams, one is the noughts, the other is the crosses. Have them stand facing each other on either side of the chairs. Pair up from each team & number them, so there should be a number 1 on each team etc.

The aim of the game is to have a row of noughts or crosses by having a team get three in a row. When you call out a number, it is a race between the member of each team to get a seat and make their X or O first. Whichever one gets there first gets to stay!

Keep calling numbers until you have one team reach three in a row!

Once your group gets the hang of the game, you might want to make it essential for them to not sit in the 3 chairs closest to their starting point to make it more challenging.
